Coding and technology enthusiast with a strong commitment to every project I undertake. I am a fast learner, highly motivated, and always eager to expand my knowledge and take on new challenges. I consider myself a strong team player who values collaboration and effective communication, as I believe that open communication is key to finding practical and innovative solutions.

WORK EXPERIENCE

July 2024 - *Today*: **TQS GROUP**
Fullstack developer
Appointed as team leader of front-end department, I review my team's work (code/design) and also translate new features into reuseable and maintainable components. My backend contribution contains database co-design & code adjustment making.

Nov 2023 - Jun 2024: **YouNet Digital Life**
Front-end developer
Responsible for every step of any front-end application. From wireframing & interactive Figma prototypes creation suitable for presentations to final translation into a user interface, by writing maintanable & scalable React components. Another aspect of my work was to upgrade and refactor former projects.

SIDE PROJECTS

Social media App - Apoechos
I designed and developed a whole social-media-like application from scratch, targeting musicians and local businesses.
Key features: Live gig sharing, chat, posts as well as interaction with local businesses, people, bands etc. Backend implementions such as complete CRUD operations, email notifications, user register, password reset and file uploading, are applied via a RESTful API.

Technologies: **Django, React, TypeScript, Bootstrap, PostgreSQL, JWT, Docker**

Property Management Software
An ongoing Administrative Software designed and developed for personal use. Some included features are Scraper, Cronjobs, User permission etc. Many attention has been given to email services and authorization.

Technologies: **Claude, Django REST Framework, NextJs, TypeScript, Mantine, PostgreSQL, Docker, Claude**

TECHNOLOGIES

- React, React Native
- NextJs
- REST API
- Django, ExpressJs
- PostgreSQL
- HTML
- CSS Preprocessors
- Git, Docker
- Claude, CodeX

TECHNIQUES

Front-End
Back-End
Mobile Development
UX/UI Design

SOFT SKILLS

Prioritizing
Troubleshooting
Debugging
Attention to detail

LANGUAGES

Greek (Native)
English (Professional)
Italian (Beginner)

FREELANCE PROJECTS

Evelyn Patsioura - Psychologist Portfolio
A minimal yet high-quality code project suitable for the needs of a professional. An email form is the reaching point for potential clients. Implemented with EmailJs Service

Github: **https://github.com/DionysisPatsiouras/evelynpatsioura**

Tsakmaki Bros Printing Services - Business Website
I designed and developed a responsive website for local business. I used Figma to wireframe and design an appealing and easy-to-use website for everyone, React for the functionality and speed performace, and Sass for styling.

Github: **https://github.com/DionysisPatsiouras/tsakmaki.gr**

Tsapo Alexanter - Portfolio
I designed and developed an outstanding SPA, showcasing strong UX/UI practices. React hooks and strong CSS knowledge allowed me to turn this complex concept into code.
